**IONIC CONDUCTOR, METHOD OF MANUFACTURING THE SAME, AND
ELECTROCHEMICAL DEVICE**

Examiner: Suitte

10/565,897 Art Unit: 1795

June 5, 2008

DETAILED ACTION

1 Applicant's election without traverse of Group I, claims 1-12, in Paper filed May 28, 2008 is acknowledged. However, it is noted that those claims have been canceled in the preliminary amendment filed January 25, 2006. Thus a new restriction requirement directed to new claims 27-52 are stated as follows.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 27-38, drawn to an ionic conductor with a polymer of a substance having a basic group.

Group II, claims 39-49, drawn to a method of manufacturing an ionic conductor with a monomer of a substance having a basic group.

Group III, claims 50-52, drawn to an electrochemical device with a comprising a negative electrode and a positive electrode.

3. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I requires a polymer of

a substance having a basic group which is not required by Group II and Group III, Group II requires a monomer of a substance having a basic group which is not required by Group I and Group III, and Group III requires an electro-chemical device comprising a negative electrode and a positive electrode which is not required by Group I and Group II.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
